It is noted, however, that applicant has not filed a complete certified copy of the 1552/2002 application as required by 35 U.S.C. 119(b). The submitted document has even pages only.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 4) Claims 1-2, 7-9, 11-14, are rejected under 35 U.S.C. 102(b) as being anticipated by Fleissner (5,575,080). Fleissner discloses a drying drum for treatment of paper. The apparatus includes housing 1, which includes blower area 4 and treatment area 3. The screen drum is mounted rotationally in the treatment area. The screen drum is

constructed of perforated metal sheet in a grid support structure of sheet metal strips, shown in Figures 2-4. This structure is surrounded externally by a fine-meshed screen 9, which on the end face of the drum is held taut onto two bases 11, 12 by means of rings. The sheet-metal strip structure comprises axially extended metal strips. The fine-meshed screen 9 is lying on the radially externally situated edges of the metal strips. The drum has axial end covers (col.2, line 43 to col. 3, line 9, Figures 1-4).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5) Claims 3-6, 15-20, are rejected under 35 U.S.C. 103(a) as being unpatentable over Fleissner in view of Luthi (3,781,957). Fleissner is applied as above for claims 1, 11. The variations in methods of attachment or connections of the structural pieces are obvious to one skilled in the art at the time the invention was made, and are well known in the art, as shown in Luthi.
